About us:

T3 Technologies, LLC is a communications equipment and service provider located in the Lehigh Valley, Pennsylvania. Our specialties include Avaya communications systems, structured cabling installation, CCTV, and all associated equipment to meet your company's needs. The owners are Alan (AJ) Wiesner, Sean Wiesner, and Mark Schlosser, all of whom bring their own individual talents. We have over 40 years of combined experience in the communications field with extensive training and experience on **AVAYA** products, formerly Lucent and AT&T. We are a leading provider in the field, offering new phone systems, repairs, upgrades, and top notch technical support. Our programming expertise will allow you to take full advantage of the powerful features your **AVAYA** telephone System offers.

AVAYA Phone Systems:

The Power of We™

T3 Technologies is an **AVAYA** Business Partner, allowing us to install and maintain the **AVAYA** product line with unsurpassed support. Our primary focus is the **AVAYA** IP Office communications system. IP Office is a versatile communications system that grows with your company as needed and cost-effectively. Built from the ground up, specifically for small and midsize businesses, IP Office offers technical flexibility and is feature rich with options such as voicemail-to-email and mobile twinning. It supports digital, analog, IP, and legacy telephone sets, or any combination of these. In addition, we continue to maintain vintage systems such as **AVAYA** Partner, **AVAYA** Merlin Legend/Magix, and the Nortel Product Line. So if you are not yet ready to upgrade, **T3 Technologies** is able to support your current **AVAYA** communications system.

Maintenance Agreements:

T3 Technologies offers maintenance agreements on your **AVAYA** Phone System. As a maintenance customer, rest assured that your equipment is covered from the unexpected. A maintenance agreement ensures you take precedence in order to get your system operational quickly and efficiently.

Structured Cabling Installation:

T3 Technologies installs all types of low voltage cabling for your voice and data network. We have the knowledge and experience to assist you in all phases of planning, implementation, installation, testing, and certification. **We Install:**

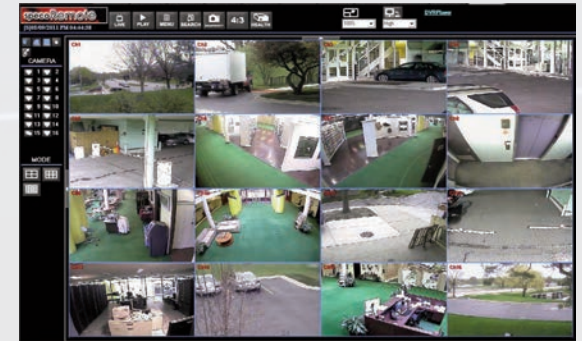

- **Category 6/6A unshielded twisted pair** – Because of its improved transmission performance and superior immunity from external noise, systems operating over category 6 cabling will have fewer errors versus category 5e for current applications. From a future proofing perspective it is always better to install the best cabling available. This is because it is so difficult to replace cabling inside walls, in ducts, under floors and other places difficult to access. Installing category 6 cabling guarantees any future equipment will be able to use the network connection to its full potential.
- **CATEGORY 5e unshielded twisted pair** – Suitable for virtually all data applications in today's industry. Although we recommend Category 6 cable, we continue to install Category 5e at the customer's request.
- **Fiber Optics** – For when the distance exceeds the 330 foot maximum limitations of copper cable, we install 50µ MM or SM fiber optic cable (or 62.5µ if your current infrastructure requires us to do so). We certify our installation to confirm the terminations are clean and have minimal loss.

- **Loudspeaker Paging – T3 Technologies** proudly installs Bogen paging amplifiers and speakers. Whether you have a small office or a large warehouse, T3 Technologies has just what you're looking for to provide you with an overhead paging solution.
- **CCTV Cable – T3 Technologies** provides the necessary cabling and equipment to support your video surveillance or CATV needs.
- **Audio/Video** – We install an array of audio/video cabling including HDMI, DVI, VGA, Component, Composite, and just about anything else for your conference room presentation.

Video Surveillance:

T3 Technologies provides video surveillance systems from Speco and Everfocus. Both allow for maximum flexibility, range, and remote access while offering help in protecting your business. Learning the system is easy with its user friendly interface, and with free iPhone and Android apps you are able to view your business from just about anywhere.

T3 Technologies offers outstanding service, competitive rates, and a wide range of abilities. We look forward to the opportunity of serving you, our customer. Give us a call today to discuss any of your companies' needs.
